

UHV gate valve with pneumatic actuator

Series 108 DN 63 - 200 mm (I. D. 2¹/₂ - 8")

This manual is valid for the following product ordering numbers: $108\ldots$ - . E14 / 24 / 34 / 44

1 Description of product

1.1 Identification of product

The fabrication number and order number are fixed on the product directly or by means of an identification plate.

1.2 Use of product

Use product for clean and dry vacuum applications only. Other applications are only allowed with the written permission of VAT.

1.3 Related documents

- Product data sheet
- Dimensional drawing

1.4 Important information

This symbol points to a very important statement that requires particular attention.

Example:

VAT disclaims any liability for damages resulting from inappropriate packaging.

1.5 Technical data

See product data sheet and dimensional drawing.

2 Safety

2.1 Compulsory reading material

Read this chapter prior to performing any work with or on the product. It contains important information that is significant for your own personal safety. This chapter must have been read and understood by all persons who perform any kind of work with or on the product during any stage of its serviceable life.

These Installation, Operating & Maintenance Instructions are an integral part of a comprehensive documentation belonging to a complete technical system. They must be stored together with the other documentation and accessible for anybody who is authorized to work with the system at any time.

2.2 Danger levels

Low risk

Indicates a hazardous situation which, if not avoided, may result in minor or moderate injury.

A CAUTION

Command

Indicates a hazardous situation which, if not avoided, may result in property damage.

NOTICE

2.3 Personnel qualifications

Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

WARNING

2.4 Safety labels

| T-9001-156 Protective cover | Label | Part No. | Location on valve |
|-----------------------------|-------|------------|-------------------|
| | | T-9001-156 | Protective cover |

Table 2-1

3 Design and Function

3.1 Design

Figure 3-1

3.2 Function

The valve features the VATLOCK sealing technology. This means, the valve is mechanically locked in the closed position. In the open position, the mechanism is not locked. Leaf springs hold gate and counter plate against the carriage with the ball retainers. The ball pairs are in the detents. For closing, the mechanism is moved forward into the closing position. The locking starts after the leaf spring stop touches the body. The ball retainers move the ball pairs out of the detents. Gate and counter plate are spread apart. The gate seal is pressed against the sealing surface without scuffing. The arrangement of the ball pairs ensures an increase of the sealing force with vacuum on either side of the gate. During opening the movements proceed in the reverse order. See «Figure 3-2».

4 Installation

Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

WARNING

4.1 Unpacking

- Make sure that the supplied products are in accordance with your order.
 - Inspect the quality of the supplied products visually. If it does not meet your requirements, please contact VAT immediately.
 - Store the original packaging material. It may be useful if products must be returned to VAT.

4.2 Installation into the system

Product may get contaminated.

Always wear cleanroom gloves when handling the product.

NOTICE

NOTICE

Sealing surfaces may get damaged. Do not use sharp-edged tools.

Contamination

Inappropriate tools

| | NOTICE |
|---|--|
| | Wrong tightening torque |
| | Valve body and screws may get damaged. |
| | Use tightening torque according the size of the screws. |
| 1 | <u>.</u> |
| | NOTICE |
| | Too long screws |
| | Too long screws |
| | Valve body may get deformed and / or malfunctions may occur. |

1. Identify flange type according the fabrication number on the identification plate; see chapter «1.1 Identification of product».

| Example: 108 – C / | = | Flange type CF-F, metric thread |
|---------------------------|---|---------------------------------|
|---------------------------|---|---------------------------------|

| Va | lve | | Maximu | um screw-in o | depth «X» ir | n mm | x |
|--|------|-----|--------|---------------|--------------|------|----|
| Nom | I.D. | | | F | lange types | ; | |
| mm | inch | | С | U | Р | J | т |
| 63 | 21/2 | X = | 13 | 13 | 13 | 13 | 15 |
| 100 | 4 | X = | 13 | 13 | 13 | 13 | 15 |
| 160 | 6 | X = | 13 | 13 | 13 | 13 | 15 |
| 200 | 8 | X = | 13 | 13 | 15 | 15 | 19 |
| C = CF-F, metric thread P = ISO-F T = ASA-LP U = CF-F, UNF thread J = JIS | | | | | | | |

Table 4-1

- 2. Remove protective covers from body flanges.
- Clean sealing surfaces and seals of both flanges; see (1) and (2) according to «Figure 4-1» on page 10.

The valve seat side is marked with the symbol $\langle \nabla \rangle$ on flange $\langle A \rangle$.

- 4. Put valve to the mounting position.
- 5. Mount the four screws (3) according to «Figure 4-1» on page 10, evenly in crosswise order until the seal touches the sealing surface.

- 1 Flange A
 2 Flange B
 3 Screws
- 6. Tighten all screws with the torques appropriate for their property classes.

4.2.1 Admissible forces and bending moments

Forces from evacuating the system, from the weight of other components or from baking can lead to deformation of the valve body and to malfunction of the valve. The stress has to be relieved by suitable means, e.g. bellows sections.

The following forces or moments are admissible:

| DN (noi | DN (nom. I.D.) Axial tensile or com- pressive force «FA» & M» | | | | | |
|---|--|------|-----|-----|----------|--------|
| mm | inch | N | lbf | Nm | lbf · ft | l e e |
| 63 | 21⁄2 | 2000 | 448 | 80 | 59 | |
| 100 | 4 | 2500 | 560 | 100 | 74 | |
| 160 | 6 | 3000 | 672 | 150 | 110 | |
| 200 | 8 | 3000 | 672 | 150 | 110 | |
| If a combination of both forces («FA» and «M») occurs, the values mentioned above are invalid. Please contact VAT for more information. | | | | | | FA◀─── |

Table 4-2

4.3 Compressed air connection

| A WARNING |
|--|
| Valve in open position |
| Risk of injury when compressed air is connected to the valve. |
| Connect compressed air only when: – valve is installed in the vacuum system |
| moving parts cannot be touched |
| Use clean, dry or slightly oiled air only. |
| Admissible air pressure range, see product data sheet. |

1. Connect compressed air according to the product data sheet and dimensional drawing.

4.4 Electrical connection

- 1. Connect solenoid valve according to the product data sheet and dimensional drawing.
- 2. Connect position indicator according to the product data sheet and dimensional drawing.
- 3. Connect heater (option) according to the product data sheet and dimensional drawing.

5 Operation

WARNING Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

Movable parts

Human body parts may get jammed and severely injured. Do not operate before product is installed completely into the vacuum system.

A WARNING

5.1 Normal operation

Valve is opened and closed pneumatically.

5.2 Operation under increased temperature

Maximum allowed temperature, see product data sheet. **Note:** After bake-out check and re-torque the bonnet screws.

5.3 Behavior in case of compressed air pressure drop

See product data sheet.

5.4 Behavior in case of power failure

See product data sheet.

5.4.1 Manual emergency operation

Movable parts

Human body parts may get jammed and severely injured. Keep human body parts away from movable parts.

WARNING

5.5

Only valid for the ordering number 108.-..34/44 (with solenoid valve)

(option)

In case of a power failure, the valve can be actuated manually if compressed air is available.

Standard solenoid valve

Press push-button (1): valve opens Release push-button (1): valve closes Figure 5-1

Trouble shooting

Solenoid valve for impulse actuation

Press push-button (1): valve opens Press push -button (2): valve closes

| Failure | Check | Action | See |
|--------------------------------|--|---|--|
| Valve does not close / open | Air pressure | Connect compressed air | «4.3 Compressed air connection» |
| | Operating pressure | Adjust operating pressure | Product data sheet |
| | Voltage at solenoid valve | Connect voltage | «4.4 Electrical connection» |
| Leak at gate | Gate seal all right? | Replace valve gate | «6.3 Replacement of valve gate (O-ring) / mechanism unit» |
| | Gate damaged or contaminated? | Replace valve gate | «6.3 Replacement of valve gate (O-ring) / mechanism unit» |
| | Operating pressure | Adjust operating pressure | Product data sheet |
| Leak at body | Bonnet seal and sealing surface all right? | Clean sealing surface – if necessary, replace bonnet seal | «6.3 Replacement of valve gate (O-ring) / mechanism unit», steps 1 to 6 |
| | Bellows all right? | Contact VAT | www.vatvalve.com |

Table 5-1

If you need any further information, please contact one of our service centers. You will find the addresses on our website www.vatvalve.com.

6 Maintenance

A WARNING

Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

A WARNING

A WARNING

Hazardous components

Human body parts may get jammed and severely injured.

Before starting maintenance:

- disconnect compressed air supply
- disconnect electrical power supply

Movable parts

Human body parts may get jammed and severely injured.

Keep human body parts away from movable parts.

6.1 Maintenance intervals

Under clean operating conditions the valve does not require any maintenance during 50 000 cycles. After 50 000 cycles, VAT recommends replacing the mechanism unit; see chapter «6.3 Replacement of valve gate (O-ring) / mechanism unit».

For more information or a general overhaul please contact one of our service centers. You will find the addresses on our website www.vatvalve.com.

6.2 Required tools

- Tool Ø6 Ø10mm; see chapter «11 Spare parts»
- Torque wrench 20 Nm / 45 Nm
- O-Ring removal tool for gates with O-ring (option); see chapter «11 Spare parts»
- Cleanroom wiper soaked with alcohol (2% methyl ethyl ketone)

6.3 Replacement of valve gate (O-ring) / mechanism unit

Loaded spring steel sheet

Human body parts may get jammed and severely injured. Do not put human body parts between valve gate and spring steel sheet.

WARNING

NOTICE

NOTICE

Contamination

Product may get contaminated.

Always wear cleanroom gloves when handling the product.

| | NC |
|-------------|-----------------------------------|
| \bigwedge | Inappropriate tools |
| V | Sealing surfaces may get damaged. |
| | Do not use sharp-edged tools. |

- 1. Vent chambers on either side to atmospheric pressure.
- 2. Open the valve.
- 3. Disconnect compressed air supply.
- 4. Disconnect electrical power supply.
- 5. Remove screws (1) according to «Figure 6-1» on page 16.
- 6. Withdraw actuator / mechanism unit carefully from body without touching the body wall; see «Figure 6-1» on page 16
- 7. Standard vulcanized gate seal: continue with step 9
- 8. **Option**: Gate seal with O-ring (follow the below steps)
 - Remove gate seal from groove, use O-ring removal tool
 - Check and clean sealing surface of valve seat
 - Install new gate seal
 - Press O-ring uniformly in crosswise order (diagonal) into groove
 - Insert actuator / mechanism unit in reverse order
- 9. Remove locking ring (5) according to «Figure 6-2» on page 16.
- 10. Withdraw bolt (4) by pulling it downwards according to «Figure 6-2» on page 16.

11. Put valve gate and ball guidance to the horizontal position so that the locking balls cannot escape.

For dismounting and mounting the valve gate always use tool (1) according to «Figure 6-3». The tool may be ordered from VAT. For details see chapter «11 Spare parts».

- 12. Lift valve gate (2) by hand and insert tool (1) between valve gate (2) and ball guidance (3); see «Figure 6-3» on page 17 and «Figure 6-4» on page 18.
- 13. Remove valve gate in direction of the arrow; see «Figure 6-3» on page 17.

14. Insert new valve gate in reverse order.

- 15. Withdraw tool according to «Figure 6-3» on page 17.
- 16. Mount bolt (4) according to «Figure 6-2» on page 16.
- 17. Mount locking ring (5) according to «Figure 6-2» on page 16.
- 18. Clean sealing surface of bonnet flange, use cleanroom wiper.
- 19. Replace bonnet seal.
- 20. Insert actuator / mechanism unit into body without touching the body wall.
- 21. Mount screws (1) according to «Figure 6-1» on page 16.

(S

Tighten screws in crosswise order with the following torques:DN 63 - 16020 Nm / 15 lbf·ftDN 20045 Nm / 33.5 lbf·ft

- 22. Connect electrical power supply.
- 23. Connect compressed air supply.

Valve is ready for use.

7 Repairs

Repairs may only be carried out by the VAT service staff. In exceptional cases, the customer is allowed to carry out the repairs, but only with the prior consent of VAT.

Please contact one of our service centers. You will find the addresses on our website www.vatvalve.com.

8

Dismounting and Storage

WARNING

A WARNING

Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

Hazardous components

Human body parts may get jammed and severely injured.

Before dismounting the product

- disconnect compressed air supply
- disconnect electrical power supply

Movable parts

Contamination

Human body parts may get jammed and severely injured. Keep human body parts away from movable parts.

NOTICE

Product may get contaminated.

Always wear cleanroom gloves when handling the product.

8.1 Dismounting

Valve in open position

Valve mechanism may get damaged if valve is in open position. Close valve before dismounting the valve from the system.

NOTICE

- 1. Close valve.
- 2. Carry out the steps according to chapter «4 Installation» in reverse order. Pay attention to the safety instructions!

8.2 Storage

NOTICE

Inappropriate temperatures and humidity may cause damage to the product.

Valve must be stored at:

Wrong storage

- relative humidity between 10% and 70%
- temperature between +10 °C and +50 °C
- non-condensing environment

Inappropriate packaging

Product may get damaged if inappropriate packaging material is used. Always use the original packaging material and handle product with care.

NOTICE

- 1. Clean / decontaminate valve.
- 2. Cover all valve openings with a protective foil.
- 3. Pack valve appropriately by using the original packaging material.

9

Packaging and Transport

Unqualified personnel

Inappropriate handling may cause serious injury or property damage. Only qualified personnel are allowed to carry out the described work.

Harmful substances

Risk of injury in case of contact with harmful substances.

Remove harmful substances (e. g. toxic, caustic or microbiological ones) from valve before you return the valve to VAT.

NOTICE

A WARNING

Inappropriate packaging

Product may get damaged if inappropriate packaging material is used. Always use the original packaging material and handle product with care.

- When returning products to VAT, please fill out the VAT form «Declaration of Chemical Contamination» and send it to VAT in advance. The form can be downloaded from our website www.vatvalve.com.
- If products are radioactively contaminated, the VAT form «Contamination and Radiation Report» must be filled out. Please contact VAT in advance.
- If products are sent to VAT in contaminated condition, VAT will carry out the decontamination procedure at the customer's expense.

9.1 Packaging

Valve in open position

Valve mechanism may get damaged if valve is in open position. Make sure that the valve is closed.

NOTICE

- 1. Cover all valve openings with a protective foil.
- 2. Pack valve appropriately, by using the original packaging material.

VAT disclaims any liability for damages resulting from inappropriate packaging.

9.2 Transport

NOTICE

Inappropriate packaging Product may get damaged if inappropriate packaging material is used. Always use the original packaging material and handle product with care.

VAT disclaims any liability for damages resulting from inappropriate packaging.

10 Disposal

Observe the local regulations for disposal

| Harmful substances |
|--|
| Environmental pollution. |
| Discard products and parts according to the local regulations. |

Unqualified personnel

Inappropriate handling may cause serious injury or property damage.

Only qualified personnel are allowed to carry out the disposal.

| | Risk of damage |
|--|--|
| | Indicates a hazardous situation which, if not avoided, may result in minor or moderate injury. A large number of diverse materials are used in the product. Some of them could cause human and machine damage in the case of improper handling. |
| | Observe local regulations in regard to waste disposal without fail. |
| | Commission an authorized waste disposal company for the |

professional disposal of your waste.

Improper disposal

NOTICE

Some built-in materials can cause damage, if improperly handled.

- When disposing, take into account all the different materials used

• Hire an authorised waste disposal company to dispose of the waste in a professional manner.

The following list should help you to dismantle your product without making serious errors and to properly separate out the product scrap.

| Material groups | Hazard level | | |
|------------------------|--------------|--|--|
| non-ferrous metals | high | | |
| stainless steel | low | | |
| aluminium | low | | |
| plastics | medium | | |
| lubricants | high | | |
| electronic scrap | high | | |
| batteries | very high | | |
| cables and wires | medium | | |
| motors | medium | | |
| seals and rubber parts | high | | |

11 Spare parts

Non-original spare parts

Non-original spare parts may cause damage to the product. Use original spare parts from VAT only.

• Please specify the fabrication number of the product when you place an order for spare parts; see chapter «1.1 Identification of product». This is to ensure that the appropriate spare parts are supplied.

NOTICE

- VAT makes a difference between spare parts that may be replaced by the customer and those that need to be replaced by the VAT service staff.
- «Table 11-1» only contains spare parts that may be replaced by the customer. If you need any other spare parts, please contact one of our service centers. You will find the addresses on our website www.vatvalve.com.

| Description | Part No. | Quantity per valve | Maintenance procedure see chapter |
|---|------------|-----------------------|--|
| Bonnet seal (Item 2 as per «Figure 6-1», page 16 | On request | 1 | «6.3 Replacement of valve gate (O-ring) / mechanism unit» |
| Gate with vulcanized seal | On request | 1 | «6.3 Replacement of valve gate (O-ring) / mechanism unit» |
